

Initial Guided Cybersecurity Survey and Next Steps Assessment

Subject matter experts at Auburn University's McCrary Institute will schedule a 30-minute survey/assessment to identify solutions that best fit your organization's current cybersecurity posture. The overarching objective is to match Local Government Entities (LGEs) and State Agencies with security implementations that better protect their networks from threat actors. During the initial survey/assessment, personnel will outline current goals and future objectives that can be accomplished through the State and Local Cybersecurity Grant Program (SLCGP).
