National Cybersecurity Review Assessment with Plan of Actions and Milestone (POA&M) and Enhanced Recommendations Workbook

Cybersecurity experts at Auburn University's McCrary Institute will guide a Local Government Entity (LGE) or State Agency through the completion of their 94 question National Cybersecurity Review (NCSR) assessment. The goal of the assessment is to identify any gaps and areas for improvement in the current cybersecurity landscape of each entity. Following the guided NCSR, the results will be analyzed, and a POA&M and an Enhanced Recommendation Workbook will be created that depicts an iterative approach to closing any gaps identified during the completion of the NCSR.
